**May Is Hepatitis Awareness Month**  
Hepatitis is an inflammation of the liver that can cause health problems, such as liver cancer and liver failure. Learn the ABCs of this serious virus.  
**Hepatitis A**

- Spread through contaminated food and drink.
- It's very contagious and you can spread the virus even if you don't have symptoms.

**Hepatitis B**

- Spread through contact with an infected person's blood or other bodily fluids.
- There's no cure for hepatitis B, but treatment can delay or reduce the risk of developing liver cancer.

**Hepatitis C**

- There isn't a vaccine to prevent hepatitis C, but treatment is available.
- Most people with hepatitis C can be cured with just 8–12 weeks of treatment.
