We can stop HIV, Iowa—by protecting our sexual health when we talk, test, treat.

talk

Talk with your partner before having sex.

Talk about when you were last tested and suggest getting tested together.

Talk to your healthcare provider about your sex life. Ask them what STI tests you should be getting and how often.

test

Get tested! It's the only way to know for sure if you have an STI or HIV.

Many STIs don't cause any symptoms, so you could have one and not know.

If you don't feel like you can ask your regular provider for an STI or HIV test, find a clinic that provides free or low cost confidential testing.

treat

All STIs, including HIV, are treatable. If you test positive for an STI, work with your healthcare provider to get the right treatment.

Ask about partner services to get your partner tested and treated. Avoid having sex until you and your sex partner both complete treatment.

If you test positive for HIV, your provider or testing location will help connect you to treatment and resources!

STI Awareness Week is April 13–19—but you can take care of your sexual health all year! Learn more & find free testing near you at stophiviowa.org.
