E-EHK boys fourth at Dunlap;
Audubon tennis falls to Kuemper

GOLF
In a meet that was moved to Tuesday, the Ex-ira-EHK boys placed fourth at the Rolling Valley Conference’s rotating round-robin meet, played at Dunlap Golf Course.
Austin Rasmussen pulled double-duty for the Spartans, as he’d also run two events at the Bob Clark Relays in Audubon just a few hours later. He came in with a 39 to lead the team.
Alex Hansen had a 43, Josh Nelson a 45 and Josten Kilworth a 52, with Jack

Hansen added a 58 to round out the contingent.
A triangular meet with Audubon, originally slated for Friday, April 25, was postponed to May 12 due to the weather.
Audubon, by the way, had the week off, thanks to the weather, as the threat of severe storms on Monday – they never really materialized – also caused the Underwood meet at Audubon Golf & Country Club to be postponed to May 12.

TENNIS
The Audubon boys’ tennis team was swept by Carroll Kuemper Catholic 9-0.
The closest set was 8-4 at No. 1 doubles, where Isaac Jackson and Carson Matthews were slotted against the Knights’ Mason Reicks and Carter Running.
“Today was a tough one to say the very least,” said coach Maryssa Soder, reflecting on playing one of western Iowa’s best Iowa Class 1A teams. “The boys went to deuce a lot more

than the set scores reflect, (and) we really struggled with finishing our games today. Regardless of the losses, we all definitely learned something and are hoping to see them again when teams play for state next month.”
The Audubon girls’ meet at Creston, slated for Thursday, April 24, was postponed to a later date due to the weather. They were scheduled to get their chance against Kuemper Catholic on Thursday, May 1.
inch walleyes are expected to be stocked into lakes, rivers, and streams across Iowa this summer. Larger 6- 9-inch fingerlings (nearly 310,000) will be stocked in lakes later this fall.
With little natural reproduction in most Iowa lakes and rivers, Iowa’s walleye populations depend on stockings. Walleyes are stocked throughout Iowa into natural lakes, interior rivers, flood control reservoirs and selected larger man-made lakes.

Walleye

with employees from the DNR’s Law Enforcement and Parks Bureaus. Entities outside of the DNR play an important role in this “once a year” operation. DNR staff from Fairport Fish Hatchery and the Bellevue Fisheries Station teamed up with staff from the fish hatchery associated with the Quad Cities Clean Energy Center just north of Cordova, IL, as they have for several years.
Personnel from DNR and the Quad Cities Fish Hatchery joined forces to collect broodstock and

spawn fish to meet egg quotas for both facilities. This team worked collaboratively to produce 79 quarts of eggs from Mississippi River females that were transferred to Rathbun Fish Hatchery for incubation and hatch. Fry hatched from these eggs will be used in an important research project comparing their survival rate to fry produced from lake strain females.
Iowa is one of the top producers of walleye fry in the United States, sur-

passed only by Minnesota in annual production. While some walleye eggs have already hatched, hatchery staff will keep a watchful eye over the remainder of the eggs during the 12-21 day incubation period. Walleye fry will be stocked into 32 public bodies of water and 10 watershed rearing ponds. While the majority of walleyes are stocked as fry, some are cultured in Iowa DNR hatcheries and stocked at different sizes. More than 1 million two-
